

Figure 4. Applications at TIL 4: receiving nodes, RI portfolios and candidate mechanisms

All 31 of the 68 executed TA projects that have a declared destination. A mechanism code is a candidate for assessment with the receiver, not a completed integration.

Evidence behind each code:				● Direct				— in R4–R7, not a declaration				○ Lineage				— R8/R9 inference only				Repository-only				— no exposure leg			
TA report (reference):				REPORT ✓				— report on file; + DOI				— it cites an SDL or own repository DOI; NO REPORT ON FILE				— none found. The report never changes the ILM level.
