

Figure 5. Applications below TIL 4: the pipeline, grouped by the control required next

The other 37 of the 68 executed TA projects, grouped by the ILM level. An earlier level is a record still to be completed, not a failure.

Evidence behind each code: ● Declared — in R1–R3 📍 Direct — in R4–R7, not a declaration ○ Lineage — R8/R9 inference only M5 provisional — exposure leg from lineage only

TA report (reference): REPORT → TIL n — the TA report already documents the missing gate(s); the ILM would reach TIL n once updated. SAME LEVEL — the report adds no gate. The card stays at its ILM level.

TIL 3 · 4 · next: record a recognised destination pathway — TA report holds it for 1

01 · SEISGEN — C1_TA2-542-1_1	○ R8/R9 lineage	DDSS: D + DP	CORE: ○M1	no repository track	To confirm → EFEHR REPORT: SAME LEVEL
02 · NonErg VRI - GMM — C1_TA2-542-1_3	○ R8/R9 lineage	DDSS: DP + SW	CORE: ○M1 ○M3	no repository track	To confirm → EFEHR REPORT → TIL 4
03 · LC-HERC2 — C2_TA3-88-2_1	○ R8/R9 lineage	DDSS: D + DP	CORE: ○M1	M5 · PROVISIONAL	To confirm → EPOS REPORT: SAME LEVEL
04 · ROTATIONAL-NIGHT — C3_TA3-83-1_2	○ R8/R9 lineage	DDSS: D	CORE: ○M1	no repository track	To confirm → EPOS REPORT: SAME LEVEL

TIL 2 · 21 · next: record outcome metadata and reuse terms — TA report holds it for 3

05 · ConvDAS — C1_TA1-44-1_1	● R1-R3 declared	DDSS: D + DP	CORE: ●M1	no repository track	Not specified → ECCSEL + EPOS REPORT: SAME LEVEL
